Thin Solid Films, 182 (1989) v–viii

Contents

ELECTRONICS AND OPTICS

Standardization and stabilization of the resistivity–temperature characteristics of CdSe thin films by vacuum annealing 1
F. Raoult, B. Fortin and Y. Colin (Rennes, France)

Optical properties of non-stoichiometric tin oxide films obtained by reactive sputtering 15
A. Czapla, E. Kusior and M. Bucko (Krakow, Poland)

Laser trimming of NiCr thin film resistors
I: Thin film resistors without a protective layer 23
V. Schultze (Jena, G.D.R.) and A. Fischer (Mittweida, G.D.R.)

Laser trimming of NiCr thin film resistors
II: Thin film resistors with an SiO_2 protective layer 35
A. Fischer (Mittweida, G.D.R.) and V. Schultze (Jena, G.D.R.)

Optical recording characteristics of implanted tellurium films. 47
J. Beauvais, P. Galarneau, R. A. Lessard, A. Singh and E. J. Knystautas (Quebec, Canada)

The effect of growth time and thickness on the electrical properties of ZnSe epilayers on GaAs substrates 53
Y. K. Su, C. C. Chang, C. C. Wei and F. J. Hwang (Tainan, Taiwan)

Electrical transport and electronic properties of amorphous carbon thin films 63
T. Frauenheim, U. Stephan, K. Bewilogua, F. Jungnickel, P. Blaudeck and E. Fromm (Karl-Marx-Stadt, G.D.R.)

Sputtered electrochromic V_2O_5 films. 79
D. Wruck, S. Ramamurthi and M. Rubin (Berkeley, CA, U.S.A.)

A novel three-terminal voltage-controlled switching device prepared by molecular beam epitaxy 87
Y. H. Wang, K. F. Yarn (Tainan, Taiwan) and C. Y. Chang (Hsinchu, Taiwan)

Investigation of the electrical conduction of thin metal films by scanning electron microscopy 97
Z. Barkay, B. Dwir and G. Deutscher (Tel Aviv, Israel)

Deposition rate, ion bombardment and gap states density in glow discharge a-Si:H,F films 105
R. Murri (Camerino, Italy), L. Schiavulli, G. Bruno, P. Capezzuto (Bari, Italy) and G. Grillo (Rome, Italy)

The optical properties of $CuInTe_2$ epitaxial layers 115
H. Neumann, B. Perlt, W. Hörig and G. Kühn (Leipzig, G.D.R.)

METALLURGICAL AND PROTECTIVE COATINGS

Two-layer thermal barrier coatings
I: Effects of composition and temperature on oxidation behavior and failure . 121
S. Stecura (Cleveland, OH, U.S.A.)

Defect structure of ion-plated titanium nitride coatings 141
W. Mader, H. F. Fischmeister (Stuttgart, F.R.G.) and E. Bergmann (Balzers, Liechtenstein)

Deposition of titanium nitride on surface-hardened structural steel by reactive magnetron sputtering. 153
M. Y. Al-Jaroudi, H. T. G. Hentzell, S. E. Hörnström (Linköping, Sweden) and A. Bengston (Stockholm, Sweden)

Adhesion studies of magnetron-sputtered copper films on chemically etched nickel substrates: effects of the concentration and the temperature of the bath 167
M. Cailler, A. Lahmar and G. H. Lee (Nantes, France)

PREPARATION AND CHARACTERIZATION

Thin composite anodic layers formed on cadmium in sodium hydroxide–sodium sulphide solutions 185
S. B. Saidman, J. R. Vilche and A. J. Arvia (La Plata, Argentina)

Alignment of columnar grains in obliquely deposited aluminium films. 197
T. Hashimoto (Tottori, Japan), K. Okamoto (Chiba, Japan), K. Hara, M. Kamiya (Kumamoto, Japan) and H. Fujiwara (Hiroshima, Japan)

Characterization of n-type amorphous chalcogenide films in the system Ge–Bi–Se 209
N. Tohge, K. Kanda and T. Minami (Osaka, Japan)

Thin film processing with pulsed electron beams 215
E. D'Anna, G. Leggieri and A. Luches (Lecce, Italy)

Evaporated metal films as substrates for hydrogenated amorphous silicon . . 229
S.-I. Ishihara (Osaka, Japan)

The incorporation of oxygen during the reactive deposition of NiCr–O resistive films 237
H. Dintner, R. Mattheis and G. Vogler (Jena, G.D.R.)

Three-component chalcogenide glasses as inorganic photoresists. 247
M. Mitkova (Sofia, Bulgaria)

A study of electroless cobalt alloy films for magnetic recording media 255
Z.-H. Liu, C. Yang, H.-M. Chen, Y.-S. He and K. Liu (Beijing, China)

Characteristics of copper-incorporated amorphous carbon film 261
P. A. Chen (Lungtan, Taiwan)

Low temperature growth of superconducting $YBa_2Cu_3O_{7-x}$ thin films by organometallic chemical vapour deposition 265
K. Kanehori, N. Sugii, T. Fukazawa and K. Miyauchi (Tokyo, Japan)

LANGMUIR–BLODGETT AND RELATED FILMS

Transient photocurrents in polycrystalline films of thionaphthenindole 271
P. Di Marco (Bologna, Italy), J. Kalinowski (Gdansk, Poland), G. Giro (Bologna, Italy) and J. Rybicki (Gdansk, Poland)

Structure of Langmuir–Blodgett superlattices with alternate bilayers of barium behenate phthalocyanine and octadecenylphenol 283
Y. M. Lvov, O. B. Gurskaja, T. S. Berzina and V. I. Troitsky (Moscow, U.S.S.R.)

Soliton mechanism of facilitated tunnelling in molecular films 297
V. N. Ermakov (Kiev, U.S.S.R.)

Spectroscopic and structural studies of scandium diphthalocyanine films . . . 307
S. Robinet, C. Clarisse, M. Gauneau, M. Salvi (Lannion, France), M. Delamar, M. Leclerc and J. P. Lacharme (Paris, France)

Optical and structural characterization of Langmuir–Blodgett multilayers of non-polymeric and polymeric hemicyanines. 319
M. C. J. Young, R. Jones, R. H. Tredgold, W. X. Lu, Z. Ali-Adib, P. Hodge and F. Abbasi (Lancaster, U.K.)

GENERAL FILM BEHAVIOUR

Ion beam sputter deposition of thin film sensors for applications in highly loaded contacts 333
E. Kagerer and M. E. Königer (Munich, F.R.G.)

LETTERS

On the use of basic zinc acetate $Zn_4O(CH_3CO_2)_6$ as a novel precursor for the deposition of ZnO by low-pressure metallo organic chemical vapour deposition: their characterization by low energy electron induced X-ray emission spectroscopy. L1
A. K. Gyani O. F. Z. Khan, P. O'Brien and D. S. Urch (London, U.K.)

Transport mechanism in a thin film metal–amorphous chalcogenide Schottky barrier L5
S. Kumar, B. R. Mehta, S. C. Kashyap and K. L. Chopra (New Delhi, India)

Properties and prospective applications of Y–Ba–Cu–O coatings L9
W.-A. Luo, C. X. Fan, J. W. Qiu, S. Z. Cai and L. S. Dai (Shanghai, China)

Modified porous glass with silane coupling reagents as an ion-exchange membrane L13
T. H. Chiang, A. Nakamura and F. Toda (Tokyo, Japan)

Réaction à l'interface dans les films minces de Cu-Sb L17
R. Halimi (Constantine, Algeria) and A. Merabet (Sétif, Algeria)

Metal–organic-compound–polymer thin films L21
K. H. Norian and U. Rieck (Bethlehem, PA, U.S.A.)
